

ARC150P

Equipment Spec

Introducing the ARC150P

Our lightest, most flexible 500 amp arc spraying system yet!

Our **LIGHTEST 150 Pistol yet!**

Our desire for continuous improvement, alongside customer feedback has led to the development of our latest range of ARC150 push systems. Our new ARC150P pistol includes many parts that are industrial 3D printed from a lightweight, carbon fibre reinforced plastic. This makes the pistol lightweight for the operator but incredibly strong and durable. We have retained our proven Arc geometry but have created a pistol that is virtually maintenance free. Our energiser and drive unit now feature ro-

bust, industrial connections as standard. Current adjustment is via a new, dustproof push button which also incorporates fault status feedback. The drive unit has an additional top set of driven rollers for a robust wire feed. Our latest trolley is compact and designed to keep the supplies connections out of the spray area and free from dust. All this combined with our high quality supplies packages and high performance rates makes our range of push systems the easiest to use on the market.

- Powerful & versatile
- Sturdy & robust
- Outstanding performance

A complete arc spraying system combining our NEW ARC150P push pistol & NEW (19) Model 500 Amp Energiser.

PUSH PISTOL

ONLY 1.03 KG (2.3 LBS)

System Overview

NEW 150P PUSH PISTOL

- Industrial 3D printed parts.
- Carbon fibre reinforced.
- Light & robust.
- Ergonomic design.
- Small pistol.
- Contact tips.

'19' SERIES ENERGISER

- Fan on demand saves power and reduces noise.
- Robust push button current control.
- Industrial plugs / sockets.
- Rear handle.

'19' SERIES DRIVE UNIT

- Compact design.
- Quick release MIG reel carriers which are easy to disassemble to feed in small access manholes.
- Lighter weight.

SUPPLIES PACKS:

- Lengths to suit.
- Industrial connections.
- Robust manifold & cover.
- Lightweight cooled conductors.

NEW FOR 2019

LIGHT & STRONG

POWERFUL

VERSATILE

Pistol

The pistol has been designed to give consistent through-puts with high coating quality at 500A. Metallisation technology has taken the conventional arc spray pistol to new dimensions, making it smaller, lighter, more ergonomic and stronger than ever, giving superior coating ability.

REDUCES OPERATOR FATIGUE

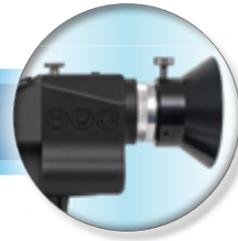

OPTIONS

Part No.	Description
ARC150P-CT16	Arcspray150 Push Pistol for 1.6mm wires
ARC150P-CT20	Arcspray150 Push Pistol for 2.0mm wires
ARC150P-CT23	Arcspray150 Push Pistol for 2.3mm wires
ARC150P-CT25	Arcspray150 Push Pistol for 2.5mm wires

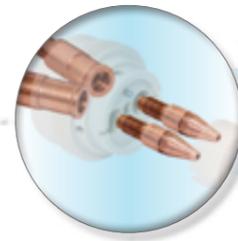

Push button design for simple operation

Carbon fibre toughness for the harshest environments.

Contact tube & tip arrangement

Proven ARC Geometry

Ergonomic grip for true comfort

INDUSTRIAL 3D CARBON FIBRE PRINTED

STRENGTH, DURABILITY & COMFORT COMBINED

Carbon Fibre Toughness

Virtually Maintenance Free

Super Light Design

'19 Series' Energiser

The energiser has been specifically designed for those users who are likely to spray a varying range of materials. Ideally suited for the Anti-corrosion industry and General Engineering Workshop.

Energy saving
AUTO-STANDBY mode

OPTIONS

Part No.	Description
S500(19)-PLC	S500(19) ARC150 Energizer with closed loop current control (500A) (415Vac)
S500FV(19)-PLC	S500FV(19) ARC150 Energizer with closed loop current control (500A) (200-220Vac)
S500D(19)-PLC	S500D(19) ARC150 Energizer with closed loop current control (500A) (200-220-380-460Vac)
PLC-E/STOP-K(19)	Remote operation E-Stop kit for (19) PLC energisers

Dust proof current control & closed loop indicator

LED & Ethernet fault alarm feedback

Sturdy control connections

New case design & rear handle

IP65 Gorilla Glass LED gauges

Claw and whip-check air connection on rear.

100% DUTY CYCLE

INDUSTRIAL CONNECTIONS

'19 Series' MIG / SPOOL Wire Dispense

The drive unit is now more compact than ever, but that doesn't mean it's any less durable. The addition of a top set of driven rollers provides an even more reliable, positive wire feed. Quick release MIG covers make it easy to disassemble & fit through small manholes. Alternatively there is the option to dispense from layer spools which also features the quick release feature.

OPTIONS

Part No.	Description
DR150(19)-**M	ARC150(19) Drive unit for MIG Dispensing (**mm)
DR150(19)-**S	ARC150(19) Drive unit for SPOOL Dispensing (**mm)

** Sizes available: 1.6mm, 2.0mm, 2.3mm, 2.5mm

Quick release MIG covers

Additional top set of driven rollers

Heavy duty (0.55kW) electric inverter drive

Profiled drive rollers for 1.6, 2.0, 2.3 or 2.5mm

Easily convertible to Push / Pull

WIRE SPECIFIC ROLLERS

GROOVED & SMOOTH SETS

REVERSIBLE FOR LONG LIFE

**NEW
COMPACT
DESIGN**

Adjustable Wire Tension

Profiled Drive Rollers

Maintenance Free Gearbox

'19 Series' Drum Dispense

Through the Metallisation wire dispensing cone, wire is neatly guided to a dispense point, then over the pulley to give a free passage of wire from the drum to pistol. As before the drive unit is now more compact than ever, and there is still the addition of a top set of driven rollers providing even more reliability.

OPTIONS

Part No.	Description
DR150(19)-**D	ARC150(19) Drive unit for Drum Dispensing (**mm)
** Sizes available: 1.6mm, 2.0mm, 2.3mm, 2.5mm	
21252-51A	Wire Dispensing Cone with Adjustable Reeling Pulley Assembly (51CM)
21252-56A	Wire Dispensing Cone with Adjustable Reeling Pulley Assembly (56CM)
21252-59A	Wire Dispensing Cone with Adjustable Reeling Pulley Assembly (59CM)
6274/5	Clamp Blocks (Pair) 1/2"
7144	1/2" Dia Ptfе Tubing

Plastic drum cone with viewing window

Variable position clamp pad assembly

150 / 250 KG FOR ZINC

200 KG FOR ZINC / ALUMINIUM

60 KG FOR ALUMINIUM

21252-51A
21252-56A
21252-59A

6274/5

7144

Smooth Pulley Action

Large Viewing Window

Built To Last

Trolley Option

The (19) series trolley allows movement of the drive unit and wire dispense around the site independently of the energiser. It has a new compact design and the facility to 'hide' the supplies connections within the trolley in order to prevent dust ingress.

OPTIONS

Part No.	Description
DR1XX(19)-ET	Extension Trolley for (19) Series Drive Units

Channelling for supplies preventing dust & damage

Braked front castors

Heavy duty rear wheels

NEW COMPACT TROLLEY

REMOVEABLE COVER

Trolley with the top cover removed.

Demonstrating where the supplies connections sit.

Trolley with the top cover in place.

Demonstrating how supplies connections are protected from damage and dust ingress.

Trolley with the drive in position.

A compact and secure set up ready for the harshest environments.

Dust Limiting Cover

Braked Front Castors

Rugged Rear Wheels

Supplies Package

The system supplies connect from the energiser or trolley to the pistol. They include the power, air & control cables & wire conduits in the suitable size for the system. Refer to system configuration pages to select supplies lengths.

OPTIONS

Part No.	Description
SUP150P(19)-5M	Arcspray 150P, 5m supplies package for electric drive, S500
SUP150P(19)-10M	Arcspray 150P, 10m supplies package for electric drive, S500
SUP150P(19)-15M	Arcspray 150P, 15m supplies package for electric drive, S500
SUP150P(19)-20M	Arcspray 150P, 20m supplies package for electric drive, S500
SUP150P(19)-10EX	Arcspray 150P, 10M Extension Supplies Package for Electric Drive, S500
SUP150P(19)-20EX	Arcspray 150P, 20M Extension Supplies Package for Electric Drive, S500

Robust 5m conduits

Twist & lock power cables and quick release air hose

Industrial connections as standard

CONDUCTOR CROSS SECTION

Lightweight air-cooled conductors reduces operator fatigue

ROBUST & STURDY COVERS

FOR S500(19) ENERGISERS

5-20 METRE & EXTENDED OPTIONS

Sturdy Industrial Connections

Torpedo Shaped Manifold

Twist & Lock Connectors

Optional Accessories

A number of accessories are available to further enhance the arc spraying process:

- ✦ The Arc beam system kit.
- ✦ Remote operation and pendants
- ✦ (19) Series data kits.

They are easily integrable and designed specifically for the Metallisation arc spraying systems.

Arcbeam system kit

Remote operation & pendants

(19) series data kits connectivity & industry 4.0 feedback

OPTIONS

Part No.	Description
ARCBEAM SYSTEM KIT	
ARCBEAM(150)1.6	Arcbeam System Kit for ARC150 using 1.6mm or 2.0mm wires
ARCBEAM(150)2.3	Arcbeam System Kit for ARC150 using 2.3mm or 2.5mm wires
21601/*	3/8" QR Air Hose (* x 6 / 11 / 16 / 21 m)
REMOTE OPERATION & PENDANTS	
PLC-REMOTE-H	Remote operation plug & cable for PLC energisers with Harting Connectors
PLC-REMOTE-K(19)	Remote operation plug & cable for (19) PLC energisers + E-Stop kit
PLC-PENDANT-H	Remote Operation Pendant for PLC Energizers with Harting Connection
PLC-PENDANT-K(19)	Remote operation pendant for (19) PLC energisers + E-Stop kit
(19) SERIES ENERGISER DATA KITS	
DATA(19)-K	Data Kit for (19) Series Energizers

ARC BEAM KIT

The Arc beam system kit reduces the arcspray footprint by forming a cone of compressed air outside the spray stream. This provides several benefits such as finer coatings and improved deposit efficiency when spraying onto small components.

The kit includes the non-opaque parts visible in the exploded illustration to the left.

REMOTE KITS & PENDANTS

The remote kits & pendant allow remote operation of the system when a pistol is mounted to a robot or manipulator. They connect into the energiser in a dedicated socket on the rear of the energiser. If remote connection is made, the pistol cannot be operated from the pistol buttons and there is no need to remove the pistol control cable from the front of the energiser.

(19) SERIES DATA KITS

The data kit allows spraying parameters and operational data to be read from the energiser. It connects via an Ethernet cable to a port that is installed on the rear of the energiser. The Ethernet cable can then be connected into a PLC, or an HMI screen or via a web browser on a laptop and the values will be written to specified registers.

**FOOTPRINT REDUCING
ARC BEAM**

**SEMI-AUTO SAFE
OPERATION PENDANT**

Packaged Systems

Our most commonly supplied systems are offered as a package with a single part number. Part numbers are made up of the pistol followed by the desired energiser, wire size, supplies length and wire dispense method. Examples are provided below:

EXAMPLES

Part No.	Description
ARC150P/S500(19)-1605M	ARC150P/S500(19) Push system, 1.6mm, 5m supplies, MIG dispense
ARC150P/S500(19)-1605D	ARC150P/S500(19) Push system, 1.6mm, 5m supplies, Drum dispense

MIG System Inclusions

INCLUDING

- ✦ 1 x Pistol (wire size as indicated).
- ✦ 1 x Supplies package (length as indicated).
- ✦ 1 x S500(19)-PLC Energiser.
- ✦ 1 x DR150(19)-MIG dispenser and drive unit.
- ✦ 1 x Toolkit.

Drum System Inclusions

INCLUDING

- ✦ 1 x Pistol (wire size as indicated).
- ✦ 1 x Supplies package (length as indicated).
- ✦ 1 x S500(19)-PLC Energiser.
- ✦ 1 x DR150(19)-DRUM dispenser and drive unit.
- ✦ 2 x 21252-51A Wire Dispensing Cone with Adjustable Reeling Pulley Assembly (51CM).
- ✦ 1 x Toolkit.
- ✦ 4m PTFE conduit & 2 x clamp blocks (pair).

Useful Information

TIME TO SPRAY

Material	Area (m ² @ 100 µm)	Time
Metallisation Wire 02E Zinc	1 10 100	1.6 mins 16 mins 2 hrs 40 mins
Metallisation Wire 01E/17E/25E/28E Aluminium & Alloys	1 10 100	2 mins 20 mins 3 hrs 20 mins
Metallisation Wire 21E Zinc/Aluminium 85/15	1 10 100	1.6 mins 16 mins 2 hrs 40 mins

The table on the left shows the approximate time it would take to spray a given area with 100 µm coating thickness.

For thicker or thinner coatings, the spraying time varies in proportion to the thickness. For example, it takes approximately 2 minutes to spray a 1 m² area of zinc at 100 µm. It would take 4 minutes to spray the same area at 200 µm.

The given times are approximate 'gun-on' spray times and do not make any allowance for stoppages, wire changes, part manipulation etc.

Note: The information given above is intended for guidance purpose only. Material usage and time taken will depend on a number of factors, these including the quality of the prepared substrate and the shape and size of the job.

Metallisation
thermal spray s

Typical System Configurations

Metallisation has the right configuration for all requirements. Below are some typical set ups. Variations of these configurations may be possible. Please contact Metallisation to discuss your specific application requirements.

THE PERFECT SOLUTION FOR EVERY APPLICATION

TYPICAL EXTENDED TROLLEY CONFIGURATIONS

Extended Supplies	Pistol Supplies	Total Max
10m	5m	15m
20m		25m
10+20m		35m
20 + 20m		45m

STANDARD CONFIGURATIONS

Most commonly used for anti-corrosion and engineering. MIG reels are easier to move around and most materials are available on MIG reels.

PUSH SYSTEM WITH WIRE IN MIG REELS

- (19) Model Energiser - 500A.
- Drive Unit & MIG Reels (can be mounted on Energiser, wall, floor or trolley).
- 5m supplies from wire drive to pistol.
- ARC150P Push Pistol.

EXTENDED CONFIGURATIONS

MIG:

Most commonly used in hard to reach areas such as boilers/vessels where access for the energiser is limited. Also used to spray longer objects where easy movement around the workpiece is needed.

DRUM:

For very long access applications where there is a benefit to remotely site the energiser away from the spraying area and maintain the benefit of having wire in drums.

PUSH SYSTEM WITH DRIVE ON FLOOR

- (19) Model Energiser - 500A.
- Supplies: 10, 15 or 20m (from energiser to pistol).
- Drive Unit (on floor / shelf) & MIG Reels (or Drum) with quick release connections.
- Conduits from wire drive to pistol: Standard 5 m.
- ARC150P Push Pistol.

Most commonly used for in-house or on-site anti-corrosion applications where drums can easily be handled.

PUSH SYSTEM WITH WIRE IN DRUMS

- (19) Model Energiser - 500A.
- Drive Unit (can be mounted on Energiser, wall, floor or trolley).
- 5m supplies from wire drive to pistol.
- ARC150P Push Pistol.
- Wire in drums.

MIG and DRUM configurations most commonly used as above but with this configuration the ability to extend the supplies is increased further.

The extension supplies from the energiser to trolley are securely joined and protected.

PUSH SYSTEM WITH DRIVE ON TROLLEY

- (19) Model Energiser - 500A.
- Extension Supplies can be 10 or 20 m complete supplies or a combination of: 10+20 (making 30 m) or 20+20 (making 40m) - joined with sleeve.
- Drive Unit (on extension trolley) & MIG Reels (or Drum) with quick release connections.
- Conduits from wire drive to pistol: Standard 5m.
- Standard supplies:
- ARC150P Push Pistol.

Detailed Specifications

PISTOL

Detailed Specifications

- Industrial 3D printing technology.
- Closed arc for improved spray conditions and efficiency.
- Air concentrator for fine coatings and contact tip cooling.
- Push button design for easy operation and maintenance.
- Standard 1.6, 2.0, 2.3 and 2.5mm wire size.
- Contact tips accessible and easily changed without dis-assembling the spray head.
- Lightweight air-cooled conductor cables are fitted; which reduces the operator supported weight and further improves the overall balance of the pistol.
- Long contact tube and tip arrangement – improved coating quality and reliability due to optimised heat dissipation.
- Spray voltage measured at the pistol for improved reliability and diagnostics with long supplies packs.
- Retrofittable to (16) range energisers (NB: requires new conduits and drive modification).

Key Information

Width	90 mm (3.5 ")
Length	190 mm (7.5 ")
Height	225 mm (8.9 ")
Weight	1.03 kg (2.3 lb)
Weight – at a held height of 1.2 m	3 kg (6.6 lb)
Maximum Current	500 Amps

Typical Performance Figures

MATERIAL	WIRE DIAMETER	STAND OFF DISTANCE	THROUGHPUT (KG/HR @ 500 A)	SUBSTRATE COVERAGE m ² / kg / 100 μm	COVERAGE QUANTITY kg / m ² / 100 μm
Metallisation Wire 01E Aluminium	2.5 mm	100 mm	12.60	3.64	0.27
		150 mm		3.11	0.32
Metallisation Wire 02E Zinc	2.5 mm	100 mm	52	1.14	0.88
		150 mm		1.07	0.94
Metallisation Wire 02E Zinc (With Super Spreaders)	2.5 mm	100 mm	52	1.13	0.89
		150 mm		1.06	0.95
Metallisation Wire 21E Zinc/Aluminium 85/15	2.5 mm	100 mm	34	1.33	0.75
		150 mm		1.28	0.78
Metallisation Wire 28E Arctec	2.3mm	*	12	3.85	-
Metallisation Wire 72E Inconel 625	1.6mm	*	13.6(@300A)	1.02	-

*Unless specified the above figures are based on spraying at around 4-6" (100mm-150mm) from nozzle to target piece.

Throughput is assumed to be independent of wire diameter. All data provided is an approximation and is offered as guidance only as performance can vary depending on application and parameters.

Detailed Specifications

S500(19)-PLC ENERGISER

Detailed Specifications

- 500 Amp Continuous operation (100% duty cycle).
- Large 'Site Capable' wheels and rigid handle offers portability on site and in workshop.
- Dust proof push button control - for current setting.
- Fan on demand (energy saving and noise reduction when not spraying).
- PLC control for improved reliability and ease of maintenance / fault finding.
- Sealed electrical control circuit - reduces dust ingress for added reliability.
- Specifically designed to suit only ARC spraying.
- LED and Ethernet fault alarm feedback.
- LED mode indicator for closed / open loop mode.
- Closed Loop Current Control – easily switchable / reliable spray rate / over-current protection.
- Robust industrial connections as standard for all control cables.
- Claw and whip-check air connection.
- Air regulators with 'lock-off' potential.
- Digital air pressure switches with display for easy setting and diagnostics
- Thermal switch on rectifiers.
- Heat sink increased for better thermal dissipation.
- Easy access energiser panels & external fuse bank for reduced Mean Time to Repair (MTTR). Shake-proof terminals minimise risk of loose control connections.
- Switched output voltage control.
- 220V/380V/415V input supply options available (hard wired).
- Remote operation E-stop kit allows energiser to be started/ stopped remotely via a pendant or interfaced into an automata E-stop circuit. It comes with a plug that can be wired as required.

Key Information

S500(19)

Dimensions (W x L x H)	670 mm x 1220 mm x 910 mm 26.4 " x 48 " x 36 "
Weight	288.8 kg (637 lb)
Input Power Requirements	380/415/460 V 50-60 Hz 3 Phase
Optional Input Power	200/220 V 3 phase 50/60 Hz
Fusing Required	37 A @ 460 Vac 40 A @ 415 Vac 44 A @ 380 Vac 76 A @ 220 Vac 84 A @ 200 Vac
Max Power Consumption	29 KVA (46 Vdc/500 A output)
Typical Power Consumption	16 KVA (Zinc 26 Vdc/500 A output) 22 KVA (Aluminium 35 Vdc/500 A output)
Duty	0-500 AMPS @ 100% Duty Cycle
Output Voltage	0-49 Vdc Switched High/Low & 1 – 5 (Nominal Spray Voltage 19 to 44 Vdc)
Air Requirements	1.5 m ³ /min @ 5 bar (53 cfm @ 72.5 psi)

DIGITAL DISPLAYS

- Easy to read with scale and numerical display.
- Higher accuracy than traditional gauges.
- Warning alert status (ammeter turns red if over-current).
- Wide viewing angle with high contrast for ease of viewing inside or out.
- IP65 rated and Gorilla glass screens.

Detailed Specifications

Technical Information

Maximum Current	500 Amps
Compressed Air	0.7m3 / min @ 3.5 Bar

ARC BEAM SYSTEM KIT

Detailed Specifications

- Reduces Arcspray footprint by forming a cone of compressed air outside the spray stream.
- Finer coatings resulting in lower porosity.
- Improved Deposit efficiency when spraying onto small components (less overspray).
- Increased hardness due to higher oxide content.
- Air hoses with quick release connections to connect the accessories to the auxiliary air supply on the energiser.

REMOTE OPERATION

Detailed Specifications

- The 'REMOTE' items consist of a 10m cable and pre-wired plug to connect to the energiser. The other end is free to allow connection to customer automation/robot etc.
- The 'PENDANT' items consist of a remote operation pendant to start/stop the system and also have an E-stop button for safe operation.
- Allows remote operation of the system for when pistol is mounted to a robot or manipulator.
- Connects into energiser in a dedicated socket on the rear of the energiser. If remote connection is made, the pistol cannot be operated from the pistol buttons and there is no need to remove the pistol control cable from the front of the energiser.

DATA KIT

Detailed Specifications

- The data kit allows information to be read from the energiser. It connects via an Ethernet cable to a port that is installed on the rear of the energiser.
- The Ethernet cable can be connected directly into a Siemens PLC, into an HMI screen (either programmable or not) that has an Ethernet port (for example, Proface or Simatic screen), or to a web browser on a laptop.
- Once connected, the values from the energiser will be written to specified registers.
- Industry 4.0 feedback.

Note:

Pendant comes with 10m control cable to connect to energiser (can be longer on request).

Data available:

Spray OK indication (on when the spray current is above 15A).
Spray Current: output value = actual spray current.
Spray Voltage: output value = actual spray voltage.
Nozzle Air Pressure: output value = nozzle air pressure in bar.
Auxiliary Air Pressure: output value = auxiliary air pressure in bar.
Fault indications (over temperature, low air pressure, over current).

Detailed Specifications
